Introduction

The CLINiC family of products from Iron Bow Healthcare Solutions consists of purpose-built telehealth video and consultation devices that enables the delivery of clinical healthcare at a distance.

This user guide covers the functionality of the Vidyo CLINiC 12x model (part number CLINiC-V-12X-A01).

The Vidyo CLINiC 12x includes a computer running VidyoRoom SE software, a high definition 12x optical/12x digital zoom video camera, a beam-forming quad microphone array, a 27” display, audio speakers and an intuitive touch-control panel. Vidyo software controls can be accessed through the touch control panel. The CLINiC camera, display, quad microphone array and speakers enable high quality video and audio calls between two parties or more. A Horus Scope digital HD hand-held camera can be connected directly to the CLINiC. Horus Scope devices enable the transmission of digital video and pictures of the human body for remote medical consultations.

The CLINiC can be interchangeably mounted on a table top, wall, extensible arm, or on a medical cart.

Figure 1. Vidyo CLINiC 12x

You can find additional CLINiC resources and information about support and other related telehealth services at www.ironbowhealthcare.com.
System Description

The primary components of the CLINiC 12x are shown in the following figure.

**Description**

1. 12x optical zoom camera
2. Integrated 27” LED 16:9 display
3. Integrated computer in custom enclosure running VidyoRoom SE software
4. Touch control panel with integrated downward-facing speakers
5. Integrated beam-forming quad microphone array

*Figure 2. Vidyo CLINiC 12x system components*
System Installation

The CLINiC should be mounted on a stable supporting structure (table top, wall, extensible arm, or medical cart) before you begin using it. Refer to Appendix: Mounting Information for mounting holes locations and dimensions.

Installing the Camera

Before using the system for the first time, you need to mount and connect the camera to the mounting panel located on top of the CLINiC 12x display.

To install the camera on the CLINiC 12x:

1. Remove camera assembly from packaging and place carefully on a table top.
2. Select one of the two camera mounting plates shown below to attach to the base of the camera.

The system is supplied with two camera mounting plates allowing the camera to be set further forward or back in relationship to the screen to suit the specific system mounting arrangement required.

Select the plate labeled a in the previous figure to mount the camera further back in relationship to the screen.

Select the plate labeled b in the previous figure to mount the camera further forward in relationship to the screen.
3. Carefully attach the camera mounting plate to the base of the camera with the provided screws.

4. Gently place the camera assembly on top of the support bracket, ensuring the locating holes on the base plate line up with the holes on the camera mounting plate.

5. Attach the camera assembly to the camera mounting plate of the support bracket. You can use either the thumb screws or the regular Philips head screws. Both sets of screws are provided (four in each set).
IMPORTANT: You need to install the two rear attachment screws first to ensure the camera assembly is in alignment with the mounting bracket. Continue to install the two front attachment screws, completing the attachment of the camera assembly to the mounting plate.

NOTE: Use a #1 stubby Philips screwdriver, if available. The stubby Philips screwdriver will make it easier to tighten the screws.
6. Connect the three cables that come out at the top of the CLINiC to the corresponding connectors on the rear of the camera, ensuring the VISCA connector is connected to the VISCA IN socket.

![Image of connected cables]

7. Attach the rear camera cable cover using the two screws provided.

![Image of cable cover being attached]

8. Gently remove any packaging foam and tape from camera to complete system assembly.
The fully assembled system is shown below.

Figure 3. Fully assembled CLINiC 12x
**Sound Deflector**

The CLINiC includes a removable sound deflector, installed underneath the control panel enclosure, as shown in the following figure.

![CLINiC 12x Sound deflector](image)

*Figure 4. CLINiC 12x Sound deflector*

This sound deflector improves the audio quality for CLINiC installations that are either wall-mounted or mounted on an arm, by deflecting the audio forward.
Connections

The CLINiC includes an AC power inlet, an Ethernet port for connecting to the network, an HDMI port for connecting an external PC, and USB ports for connecting a Horus Scope and various input control devices such as a keyboard, mouse, or optional remote control unit.

Figure 5. CLINiC 12x power, network, data, and input device ports
The CLINiC includes audio ports on the integrated control panel, as shown in the following figure.

**Figure 6. CLINiC 12x audio ports on the integrated control panel**

**Description**

1. Headphones audio output
2. Stethoscope audio input (not supported in the current release of the VidyoRoom SE software)
Connecting Peripherals

The connections described in this section are recommended for connecting a PC, a Horus Scope, and input control devices such as a keyboard, mouse, or Radio Frequency (RF), Infrared (IR) remote control transmitters.

Connecting a PC

Connect a PC to the HDMI input labeled 5 in Figure 5. CLINiC 12x power, network, data, and input device ports. This input is associated with the button on the control panel.

Connecting a Horus Scope

You can connect a Horus Scope digital HD hand-held camera to one of the USB ports labeled 4 in Figure 5. CLINiC 12x power, network, data, and input device ports. The button is associated with the Horus Scope when a Horus Scope is connected to one of the USB ports.

Connecting the Keyboard and Mouse

Connect the supplied keyboard and mouse to the downstream (downlink) ports of the supplied USB hub. Connect the upstream (uplink) port of the USB hub to the CLINiC USB port labeled 4 in Figure 5. CLINiC 12x power, network, data, and input device ports.

Connecting the Optional RF or IR Remote Control Transmitter

Connect the optional USB RF or IR remote control transmitter to one of the USB ports labeled 4 in Figure 5. CLINiC 12x power, network, data, and input device ports.
Getting Started

**Powering On and Off**

The CLINIc control panel, display, camera and enclosed PC will automatically power on when connected to AC power.

**Powering On the CLINIc**

Connect the peripherals to the HDMI and USB ports of the CLINIc before connecting the CLINIc to AC power.

*To power on the CLINIc:*

- Connect the CLINIc to AC power. This will automatically power on the integrated computer, camera, display and control unit of the CLINIc. A splash screen is displayed within several seconds.

**Waking Up the CLINIc**

The system goes to sleep after one hour with no activity. This value can be changed from the *Settings* menu of the VidyoRoom administrator user interface (Admin UI). See *CLINIc Administration* for more information.

*To wake up the CLINIc:*

- Press any button on the integrated control panel.

**Powering Off the CLINIc**

Powering off the CLINIc is typically unnecessary. Most video endpoints remain connected to the network and in stand-by mode until a call is placed or received. However, you may need to power off the CLINIc if you need to move the CLINIc to a different room.

*To power off the CLINIc:*

- Disconnect the CLINIc from AC power.

**Restarting the CLINIc**

You can restart the CLINIc by powering off and powering on the CLINIc.

**Connecting to the Network**

Before you can make and receive video calls with the CLINIc, you must connect the unit to the network. There are two ways you can connect to the network: using the integrated Wi-Fi with external antenna, or using the 10/100/1G Ethernet port. The current VidyoRoom SE software only runs on a Windows 7 operating system. Follow the usual procedures of adding a Windows 7 computer to your corporate network.
Control Panel Functions

The CLINiC control panel buttons and functions are described in the following figure.

![Diagram of CLINiC control panel functions]

**Description**

1. Answer call or place call to selected directory location.
2. End or reject call.
3. Stop the video transmission from the CLINiC camera during a call, or revert to normal video transmission. Video from a connected PC, medical video device, or other video peripheral will still be shown to local and remote participants.
4. Display and transmit video from a connected Horus Scope. Pressing this button displays and transmits video from the Horus Scope connected to the USB input.
5. Display and transmit images and data from a connected PC. Pressing this button displays and transmits the signal from the video source associated with the HDMI input.
6. Zoom camera out.
7. Zoom camera in.
8. When not in a call: navigate through menus; When in a call: pan and tilt the camera.
9. Enable or disable self-view mode.
10. Decrease speaker volume.
11. Increase speaker volume.
12. Mute or unmute microphone.
13. Enable or disable headphone mode for private listening.
14. Enable or disable stethoscope mode (not active in current version of the VidyoRoom SE software).

*Figure 7. Control panel functions*
Managing Calls

You can manage calls by either using the integrated control panel, the provided keyboard and mouse or either of the optional remote control units.

This section describes how to manage calls by using the integrated control panel.

For instructions on how to manage calls using the optional remote control units, refer to the *VidyoRoom and VidyoPanorama 600 Quick User Guide*.

When using a keyboard and mouse, navigate the menus as you would when using a PC.

**Answering a Call**

The Vidyo CLINiC can be set to answer incoming calls automatically or manually.

If the CLINiC is not set to answer incoming calls automatically, the system will prompt you to answer the call manually when an incoming call is received.

The way calls are answered is configured in the *Settings* menu of the VidyoRoom Admin UI (see *CLINiC Administration*).

*To answer a call manually:*

- Press 📞 on the integrated control panel.

**Ignoring a Call**

If the CLINiC is not configured to answer calls automatically, you can manually ignore a call.

*To ignore an incoming call manually:*

- Press 📞 on the integrated control panel.

**Ending a Call**

*To end a call:*

- Press 📞 on the integrated control panel.

**Placing a Call**

You may place a call to a pre-defined video endpoint address. Before you can place a call to an address using the integrated control panel, you must add the address to your contacts list (see *CLINiC Administration*).

*To place a call:*

1. Use the arrow keys <left> <right> <up> <down> to navigate to and select desired endpoint address.

2. Press 📞 on the integrated control panel to call the selected endpoint address.
Managing Video Settings

This section describes how to manage video settings by using the integrated control panel.

**Enabling and Disabling Video Privacy Mode**

To enable privacy, you can turn off video transmission from the CLINiC camera to the remote end while still remaining connected to the call. The remote party will no longer receive video from the CLINiC camera. In this mode, video from a PC or other video peripheral that is being shared will still be seen. Video transmission from the CLINiC camera can be stopped or restarted at any time, whether you are in a call or not.

**To enable privacy mode:**

- Press on the integrated control panel. The associated LED will light when the video transmission from the CLINiC camera is stopped. Additionally, an indication that the video transmission is paused appears on the display.

**To disable privacy mode:**

- Press again on the integrated control panel. The associated LED will turn off, and video transmission from the CLINiC camera will resume.

**Enabling and Disabling Self-View Mode**

You can display or hide the self-view window on the screen.

**To enable self-view:**

- Press on the integrated control panel.

**To disable self-view:**

- Press again on the integrated control panel.
Zooming Camera In and Out

To zoom camera in:

- Press the zoom in \( \text{button} \) on the integrated control panel, immediately above the magnifying glass symbol \( \text{symbol} \). Press this button repeatedly to zoom in further.

To zoom camera out:

- Press the zoom out \( \text{button} \) on the integrated control panel, immediately below the magnifying glass symbol \( \text{symbol} \). Press this button repeatedly to zoom out further.

Panning and Tilting Camera

The camera on the CLINiC 12x supports full pan and tilt functionality.

To pan the camera:

- Press \( \text{left arrow} \) or \( \text{right arrow} \) to pan to the left or to the right, respectively.

To tilt the camera:

- Press \( \text{up arrow} \) or \( \text{down arrow} \) to tilt up or down, respectively.
Managing Audio Settings

This section describes how to manage audio settings by using the integrated control panel.

**Enabling and Disabling Microphone Mute Mode**

You can mute and unmute the microphone during a call. Muting the microphone prevents the remote end from hearing conversations at your site.

NOTE: Muting the microphone does not mute the audio sources connected to the CLINiC input ports, such as the stethoscope.

NOTE: The stethoscope functionality is not available in the first release of the Vidyo CLINiC.

**To mute microphone:**

- Press on the integrated control panel. The associated LED will light when the microphone is muted. Additionally, a microphone mute icon appears on the display.

**To unmute microphone:**

- Press again on the integrated control panel. The associated LED will turn off.

**Adjusting Speaker and Headphone Volume**

**To increase speaker and headphone volume:**

- Press and hold the button on the integrated control panel, immediately above the speakerphone symbol until the desired sound level is achieved.

**To decrease speaker and headphone volume:**

- Press and hold the icon on the integrated control panel, immediately below the speakerphone symbol until the desired sound level is achieved.
Enabling and Disabling Audio Privacy Listening Mode

Audio from the remote participant always plays through both the integrated speakers and the headphone output. Enabling Audio Privacy Mode mutes the integrated speakers so that audio plays only through the headphone output for private listening. The headphone audio output is shown in Figure 6.

To enable Audio Privacy Listening Mode:

- Press 🎧 on the integrated control panel. The associated LED will light when this mode is enabled.

To disable Audio Privacy Listening Mode:

- Press again 🎧 on the integrated control panel. The associated LED will turn off.
Sharing Content from Connected Devices

You can share content from an external PC or a Horus Scope connected to the CLINiC. You can share video content from one source at a time. Make sure the external PC is connected to the HDMI port, and that the Horus Scope is connected to one of the USB ports.

Sharing Content from an External PC

The button is associated with the HDMI source and is used to share content from an external PC.

To share content from the external PC:

- Press on the integrated control panel. The associated LED will light when this source is selected. Video from this source will be displayed on the screen.

Sharing Content from the Horus Scope

The button is associated with the Horus Scope when a Horus Scope is connected to one of the USB ports.

To share content from the Horus Scope:

- Press on the integrated control panel. The associated LED will light when this source is selected. Video from the Horus Scope will be displayed on the screen.

Switching between Video Sources

You can easily switch between video sources by pressing the button associated with the video source to which you want to switch.

For instance, if video from the external PC is displayed on the screen, press on the button associated with the Horus Scope to switch to the Horus Scope. Video from the Horus Scope will then be displayed.
You can modify the default functions of the Vidyo CLINiC by logging in as an administrator to the VidyoRoom Admin UI and performing the desired changes.

For the complete set of instructions, please refer to the *VidyoRoom and VidyoPanorama 600 Administrator Guide*.

### Accessing the Vidyo Admin Settings

*To access the admin settings:*

1. In your web browser address line, enter the system IP address. The Admin UI Login tab appears.

   NOTE: The system IP address is displayed on the screen when you first boot up the Vidyo CLINiC. After boot-up, when not in a call, the IP address is displayed in the bottom right hand corner of the screen.

2. In the Login tab, enter the admin login username (default is admin) and password (default is password).

3. Click Login. The rest of Admin UI tabs appear.

4. Click the Settings tab to display all settings options.

### Mandatory CLINiC Settings

The following settings are required for using the VidyoRoom SE software with the CLINiC. These settings can be applied in the Preferences menu.

*To apply the mandatory settings:*

1. In the Admin UI, click the Settings tab.

2. If needed, click the blue triangle next to the word Preferences to view the Preferences menu.

3. Make sure the options Enable AEC, Enable Audio Processing, Preview Local Content and Enable HDMI-CEC are all unchecked. If any of these options are checked, click in the corresponding box to uncheck them.

4. If you made any changes you want to save, click Save.
Enable/Disable Auto Answer

You can change the way calls are answered from the CLINiC. The Vidyo CLINiC can be set to answer incoming calls automatically or manually.

To enable automatic call answering:

1. In the Admin UI, click the Settings tab.
2. If needed, click the blue triangle next to the word Preferences to view the Preferences menu.
3. Make sure the Auto Answer option is checked. If the option is unchecked, click in the corresponding box to check the option.
4. Click Save.

To disable automatic call answering:

1. In the Admin UI, click the Settings tab.
2. If needed, click the blue triangle next to the word Preferences to view the Preferences menu.
3. Make sure the Auto Answer option is unchecked. If the option is checked, click in the corresponding box to uncheck the option.
4. Click Save.

Change Sleep Settings

The system goes to sleep after one hour with no activity.

To change when the system goes to sleep:

1. In the Admin UI, click the Settings tab.
2. If needed, click the blue triangle next to the word Preferences to view the Preferences menu.
3. Change the Display Sleep Timeout value (default is 3600 seconds).
4. Click Save.

For changing any other settings, please refer to the VidyoRoom and VidyoPanorama 600 Administrator Guide.
Add Contacts

Before you can place a call to an address using the CLINiC integrated control panel, you must add the address to your list of contacts.

To add a new address to your list of contacts:

1. In the search box of the VidyoRoom pre-call menu, enter the desired address.

As soon as you start typing, the addresses that match the typed characters and that are reachable in your network will be populated under the search box.
2. Once you finished typing the address or the system has displayed the desired address under the search box, you can select the address. Use the mouse, arrow keys on your keyboard or remote to move down from the search box and highlight the contact. Press **Enter** on the keyboard or **OK** on the remote.

![Image](image.jpg)

3. Use the mouse, arrow keys on your keyboard or remote to select **Add to My Contacts**. Press **Enter** on the keyboard or **OK** on the remote to save the contact to your list.

For more information on managing contacts, please refer to the *VidyoRoom and VidyoPanorama 600 Quick User Guide*.
