

**EXPANDING THE  
BOUNDARIES OF  
HEALTHCARE**

## **PRODUCT ANNOUNCEMENT**

### **Iron Bow's MedView**

April 11, 2019, Iron Bow Healthcare Solutions announces the addition of MedView™ to its telehealth product portfolio. MedView is designed to deliver enterprise telehealth capabilities to each patient room at unparalleled affordability. MedView's small form factor design couples with the existing in-patient room infotainment screen for the display of the video consultation.

MedView can be used in hospital settings as well as skilled nursing facilities, long-term care facilities, urgent care facilities, ambulatory surgery centers, physician practice offices and countless other care settings.

MedView provides high quality video and audio capabilities for general consultations, patient monitoring, tele-ICU, e-rounding, virtual family visits, care coordination, multi-specialty visits, patient education and discharge planning.

MedView integrates with electronic health records systems and optimizes access to hospital resources (care coordinators, case managers, specialists and other staff) for multi-campus hospitals and health systems. MedView is designed as a simple solution to transform health systems' care delivery models to provide enhanced patient outcomes.

Iron Bow offers IronCare™ Maintenance and Managed Services for proactive monitoring and issue resolution of the unit, up to and including replacement of the unit.
